#### **DETAILED ACTION**

Amendment B, filed 8/8/2003 has been entered.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Gandhi et al. (US 5747919).

Gandhi discloses (fig 2) an insulating plug for a discharge lamp device with a body (37) having a front end portion and a rear end portion, an arc tube (8) fixedly held at the front end portion, a lamp-side connector (30) provided at the rear end portion arranged so that a power-supplying connector can be attached to and detached from the lamp-side connector, and the entirety of the body is made of a glass-fiber-reinforced plastic (column 5, table 1).

Regarding claim 2, Gandhi discloses the plastic includes from 20 weight % to 80 weight % glass fibers and polyphenylene sulfide resin.

Regarding claim 3, Gandhi discloses a discharge lamp device provided with an insulating plug.

Regarding claim 4, Gandhi discloses a discharge lamp device provided with an insulating plug.

Claim Rejections - 35 USC § 103

Art Unit: 2879

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gandhi et al (US 5747919) in view of Nagashima et al. (US 5910560).

Gandhi discloses all of the above claim limitations but fails to discloses 40 to 60 weight % glass fibers.

Nagashima discloses using 40 to 60 weight % glass fibers (table 3) in order to have a resin material having an excellent processing property and a high degree of freedom and for reinforcing.

Hence it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the plug of Gandhi with the 40 to 60 weight % glass fibers (table 3) in order to have a resin material having an excellent processing property and a high degree of freedom and for reinforcing, as taught by Nagashima.

Regarding claim 6, Gandhi discloses a discharge lamp device provided with an insulating plug.

## Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 09/899,281
